PROFILE

Email Developer specializing in building dynamic, modular templates and interactive campaigns using HTML, CSS, and JavaScript. Skilled in troubleshooting cross-client rendering issues, implementing CRM personalization, and enhancing email performance with automation and segmentation. Experienced with Salesforce Marketing Cloud, AMPscript, SQL, and industry tools such as Litmus and Email on Acid.

EXPERIENCE

Freelancing – Email Marketing Developer | Jun 2025 – Present

- Developed responsive landing pages and sign-up forms integrated with **Mailchimp, HubSpot, and Salesforce Marketing Cloud** to capture and engage audiences.
- Built and optimized campaigns in **HubSpot, Mailchimp, and Salesforce Marketing** ensuring accurate personalization and segmentation.
- Conducted QA testing with **Litmus and Email on Acid**, resolving rendering issues across Outlook, Gmail, Apple Mail, and mobile clients.
- Implemented **automation workflows and CRM-driven segmentation** to trigger personalized campaigns based on customer behavior and data.
- Improved **deliverability and campaign performance** by applying email best practices, accessibility standards, and compliance guidelines.

Freelancing – Email Developer | Feb 2025 – Present

- Utilized **MJML Framework** within VS Code to develop modular email templates, streamlining production and ensuring responsive design.
- Applied **email design best practices** in layout, composition, and typography to create engaging, effective communications.
- Conducted rendering and QA testing across Gmail, Outlook, iOS, and Android using **Email on Acid**, troubleshooting creative and deployment issues.
- Use CRM segmentation and automation to deliver **personalized customer journeys** and increase engagement.
- Ensured consistent

Freelancing – Web Developer | Feb 2025 – Present

- Built a responsive landing page with a **Mailchimp-integrated sign-up form**, enabling seamless audience list growth.
- Implemented **conditional logic (If statements)** to dynamically validate and respond to user sign-ups.
- Optimized UX by designing a fully responsive, mobile-friendly interface that improved accessibility and engagement.
